Quick Installation Guide

Follow these steps to get the application running quickly.

Prerequisites

- PHP 8.2+
- PostgreSQL 14+
- Composer

Installation Steps

1. Install Dependencies

```
cd laravel_garden_service
composer install
```

2. Environment Setup

```
cp .env.example .env
php artisan key:generate
```

Edit `.env` file:

```
DB_CONNECTION=pgsql
DB_DATABASE=laravel_garden
DB_USERNAME=postgres
DB_PASSWORD=your_password
```

3. Database Setup

```
# Create database
createdb laravel_garden

# Run migrations and seeders
php artisan migrate
php artisan db:seed
```

4. Storage Link

```
php artisan storage:link
```

5. Run Application

```
php artisan serve
```

Visit: http://localhost:8000

Admin Access

URL: http://localhost:8000/admin

Credentials:
- Email: admin@edensgrona.se
- Password: password

⚠️ **Change password after first login!**

Next Steps

1. Update contact information in admin panel
2. Add/edit services
3. Upload images
4. Customize content
5. Test contact form
